Allowable Subject Matter

1. Claims 1-4, 6-22 and 62-64 allowed, (renumbered as 1-24).
2. The following is an examiner's statement of reasons for allowance:

There is no reference in prior art fairly teach or suggest a three-dimensional liquid detection sensor and method (**claims 1 and 62**) comprising:

a three-dimensional (3D) liquid detection field including:

a first electrically conductive trace connected to a first electrical contact, with a first plurality of pins extending from the first trace at least partially covered by an electrical insulator; and,

a second electrically conductive trace connected to a second electrical contact, with a second plurality of pins extending from the second trace at least partially covered by an electrical insulator; and,

a first electrical connector to supply a resistance measurement responsive to liquid in the detection field.

There is no prior art fairly teach or suggest a three-dimensional liquid detection sensor (**claim 64**) comprising:

a three-dimensional (3D) liquid detection field including:

a dielectric sheet;

a first electrically conductive trace formed over the dielectric sheet and connected to a first electrical contact, with a first plurality of pins extending from the first trace in an axis aligned with a first plane;
